All District Students
Parents/Legal Guardians of all students

Re: Asbestos in Dayville School District 16J

As required by U.S. Environmental Protection Agency (EPA) you are hereby informed that Dayville School District 16J's structures contain Asbestos-containing building material (ACBM).

In accordance with AHERA regulation, an asbestos inspection and management plan was written and implemented on October 22, 1991. Therefore every 6 Months the asbestos containing material in Dayville School Dist 16J will have periodic surveillance performed and documented. Every three years the facility will be re-inspected completely by a certified inspector. The last inspection was performed on November 15, 2018. Asbestos found in Dayville School does not pose a threat to health or environment. Management plans are located in the District Maintenance Office. These are available during normal school days and hours if you should choose to inspect them. A full copy or a copy of parts of the plan will be available for purchase at the cost of copying. Anyone who feels there is a damaged asbestos containing building material (ACBM) in the Dayville School should contact the District Office as soon as possible to report such findings.

If anyone has any questions regarding the District's activities on asbestos, please contact Lonnie Dickens at the Dayville School District 16J number 541-987-2412 ext117.

Sincerely,

Lonnie Dickens
Designated Asbestos Manager/Maintenance Coordinator
